PROFESSIONAL SUMMARY

Results-driven Full-Stack Mobile Developer and Technical Founder with 3+ years of hands-on experience building and shipping production-grade applications. Founder and sole technical architect of AllRoutes Logistics — a live, cross-platform logistics platform available on both Google Play Store and iOS App Store, serving an active rider network across Nigeria with real-time order tracking and payments. Specialises in Flutter mobile development, scalable Node.js backend architecture, and rapid MVP delivery. Seeking a remote opportunity with a Canadian company, with full openness to relocation.

FLAGSHIP PRODUCT

Founder & Full-Stack Developer | AllRoutes Logistics 2024 – Present • Lagos, Nigeria

A live, cross-platform logistics and last-mile delivery platform — available on Google Play Store and iOS App Store — with an active rider network and real-time order tracking.

- ▶ Architected and deployed a production Flutter app for iOS and Android with real-time order management, face detection onboarding, live GPS tracking, and push notifications
- ▶ **Node.js/TypeScript REST API backend** Built a scalable
- ▶ deployed on a custom domain, handling authentication, order lifecycle, payment processing, and Socket.io real-time communication
- ▶ Developed a React/TypeScript admin and customer-facing web platform integrated with the same backend infrastructure using Tailwind CSS
- ▶ Integrated Firebase Cloud Messaging (FCM), Google Maps API for route polylines and geolocation, and a payment gateway for rider wallet and debt management
- ▶ Implemented AWS Rekognition and S3 for production face verification — riders snap a selfie during onboarding which is matched against their stored profile image using machine learning, ensuring secure identity confirmation
- ▶ Managed full DevOps lifecycle: app signing, Play Store and App Store publishing, environment configuration, and production deployment
- ▶ Currently conducting internal team testing on Android ahead of full public launch

EXPERIENCE

Freelance Full-Stack Developer | Self-Employed 2022 – Present • Lagos, Nigeria

- ▶ Delivered multiple client projects including chat applications, e-commerce platforms, expense trackers, and task management tools
- ▶ Built and shipped Flutter apps with complex state management, REST API integrations, and polished UI/UX
- ▶ Helped startups and small businesses build revenue-generating MVPs from ideation to deployment
- ▶ Provided technical consultation on mobile architecture, backend design, and product strategy

TECHNICAL SKILLS

Mobile	Flutter (Dart), Provider, GetIt, Riverpod, Flutter Secure Storage, Firebase Messaging
Frontend	React, TypeScript, Tailwind CSS, HTML5, CSS3
Backend	Node.js, Express.js, TypeScript, REST APIs, Socket.io, GraphQL

Database	MongoDB, Firebase Firestore
DevOps	Git, GitHub, Docker, Render, Google Play Console, App Store Connect, Firebase Console
APIs	Google Maps API, Firebase FCM, Google ML Kit, Payment Gateway Integration
Other	Clean Architecture, Dartz (functional programming), Agile/Scrum, AI-assisted development

OTHER NOTABLE PROJECTS

Chat Application — Real-time messaging app with Socket.io, user authentication, and message history

Meals App (Flutter) — Category browsing and favourites with Riverpod state management (public on GitHub)

Expense Tracker & Task Planner — Full-featured productivity apps demonstrating Flutter UI and local persistence

EDUCATION

Software Engineering Bootcamp | **Decagon Institute** 2022 – 2023 • Lagos, Nigeria

- ▶ Intensive full-stack engineering programme covering Node.js, React, databases, algorithms, and software best practices
- ▶ Collaborated in agile teams, conducted code reviews, and built production-ready applications

Higher National Diploma — Mechanical Engineering | **Federal Polytechnic Auchi** 2012 – 2016 • Nigeria

- ▶ Graduated with Distinction — ranked #1 in class as Best Mechanical Engineering Student
- ▶ Strong foundation in analytical thinking, systems design, and problem decomposition
